

Gemini 3.6 Flash native-video exam — revision 0.2.0

PUBLIC RESULT · FIXED EVALUATION

42.11/100

Measured quality, separate from the pass gate

OUTCOME

Did not pass

COMPLETED

1 recorded attempt

ANNOTATIONS · VALID / INVALID

6 / 0

MODEL

gemini-3.6-flash

Box matching F1: 0.00. Required: 1.00. The attempt did not meet the exam pass criteria.

Recorded quality axes and margins

MEASURE	VALUE	MINIMUM · MARGIN
Box F1	0	pass gate ≥ 1 · -1.00
Box IoU	0	item match ≥ 0.5 · mean -0.50
Classification accuracy	1	pass gate ≥ 1 · met (gate is the maximum)
Event temporal IoU	0.31	item match ≥ 0.5 · mean -0.19
Segment temporal IoU	0.9	item match ≥ 0.5 · mean +0.40
Track consistency on matched boxes	0	pass gate ≥ 1 · -1.00

A pass gate is the value an axis must reach for the exam to pass. An item-match minimum is the overlap one item needs to count as matched; the margin shown for a mean overlap is the mean's distance from that minimum, not any single item's.

Track consistency is conditional on successful box matching. It does not repair a missed localization.

What was evaluated

INPUT CONDITION
native video file; provider-side sampling is not independently observed.
EXAM AND REVISION
Robot catch temporal and tracking annotation · v0.2.0

Limits on the claim

- n=1: this result does not establish general model capacity or a stable success rate.
- Provider-side video or frame processing was not independently observed.
- This record does not include independent human validation of the reference answers.
- Quality is a grader measurement; the pass decision is a separate threshold verdict.
